Timble.us

WHAT IS HAPPENING IN THE NEWS *RIGHT NOW* THAT MAKES YOU RELEVANT *RIGHT NOW*?

Can you remember a day recently without any news from the world of new technology? Difficult, isn't it? That's because ICT sector is one of the fastest growing industries in the world. Timble, our time tracking app, aims at facilitating the work of all the tech professionals out there.

WHAT IS THE PROBLEM THIS COMPANY IS SOLVING?

More technology advancements equals more IT professionals working day and night on those technological dreams to come true. Heavy workload alert! However, project management and time tracking can be faster, cheaper and as effective as never before.

WAS IT A PERSONAL PROBLEM YOU HAD?

We created Timble because we believe that time tracking doesn't have to be tedious. The idea is based on our research, experience and passion. Timble is a simple app which helps you focus on the important stuff. As in IT company, we tried it ourselves and decided to share the proven solution with other professionals out there.

DESCRIBE THE GENESIS OF THE PRODUCT?

Vast majority of IT teams use multiple tools for project management and as a result – get flooded with notifications from many sources, not to mention the need to keep track of all of them at once. And here's a(not-so)fun fact - do you know that even 15% of all working time is lost on reporting and work organization? Well, we know – that's why we created Timble. A simple app which helps you focus on the job.

WHAT DOES IT *ACTUALLY* DO?

Timble integrates with project management platforms and after a one-time authentication automatically synchronizes all tasks and projects – both ways! You can plan and manage your work schedule by dragging and dropping tasks onto a timeline. Even if you have thousands of open issues, using custom filters you can easily narrow their range to stay focused on the ones currently most important. And all that is just one press-of-a-button away.

DESCRIBE IT AS IF YOU WERE DESCRIBING IT TO A NON-TECH PERSON ON THE STREET:

You can plan and manage your work schedule by dragging and dropping tasks onto a timeline. It helps you control the time spent working on particular issues and better manage your tasks. You get a clear overview of you work day, week or month to boost your productivity.

HOW MUCH TRACTION DO YOU HAVE>

Timble.us

The app is already being used in Europe by 120 users that so far have tracked more than 65.000 hours of work. Those are IT Teams or tech consultancy companies from Sweden, Denmark and Poland. They moved from their in house solutions and Timble has become their only time-tracking and reporting tool.

WHAT ARE THE KEY DIFFERENTIATORS BETWEEN YOU AND OTHER PLAYERS?

How do we differentiate form other players on the market? Except from all the above mentioned advantages, we can also list:

- Integration with multiple project management tools

- Simultaneous tracking on desktop and mobile

- Providing visual feedback on estimated vs real time spent on tasks and projects.

WHO ARE THE INVESTORS?

Our project is self founded.

WHO IS IN THE TEAM?

The team working on Timble consists of 6 people working full time, backed up by a successful software house with 7 years of experience on the market. European precision paired with experience of the skilled team resulted in creating a product that can help revolutionize project management.

WHERE IS THE TEAM BASED? IS IS THE SAME AS THE COMPANY HQ?

Inwedo – a company well-known for its innovative approach is behind this time tracking novelty. The company headquarters as well as the team are both based in Poland – homeland to many world famous IT professionals.
